PROFESSIONAL SUMMARY

MERN Stack Developer with a strong focus on frontend development and building responsive, user-friendly web applications using React.js. Skilled in creating modern and intuitive user interfaces, integrating RESTful APIs, and working with JavaScript, Node.js, Express.js, and MongoDB. Passionate about writing clean, maintainable code and continuously learning modern web development technologies.

EDUCATION

•Bachelor of Computer Applications

International School of Business Administration

Expected July 2027

GPA: 7.50

PERSONAL PROJECTS

•Uber Clone

Full-stack ride-booking web application

- Built a full-stack Uber-inspired ride-booking application with separate authentication for users and captains.
- Integrated OpenStreetMap (Nominatim) and OSRM APIs for location search, distance calculation, and dynamic fare estimation using latitude and longitude.
- Implemented real-time ride updates using Socket.io and deployed the application on Vercel.
- Technology Used: React.js, Node.js, Express.js, MongoDB, Socket.io, OpenStreetMap, OSRM.

•AI Resume Builder

AI-powered resume creation platform

- Developed an AI-powered resume builder that enables users to create professional resumes using customizable templates and accent colors.
- Integrated Google Gemini API to enhance professional summaries and job descriptions using AI.
- Built a responsive and user-friendly interface for seamless resume creation and customization.
- Technology Used: React.js, Node.js, Express.js, MongoDB, Google Gemini API, Tailwind CSS.

•QuickGPT

Full-stack AI chat application

- Built a full-stack AI chat application using Google Gemini API for AI-powered conversations.
- Implemented new chat creation, chat history, and chat search features for efficient conversation management.
- Developed a credit-based system to manage AI usage and integrated Stripe Payment Gateway for secure credit purchases.
- Implemented Stripe Webhooks for payment verification and JWT-based authentication for secure API access.
- Technology Used: React.js, Node.js, Express.js, MongoDB, Google Gemini API, Stripe, JWT.

TECHNICAL SKILLS

Languages: C, Python, JavaScript, HTML, CSS

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB

Authentication: JWT, Cookies, Protected Routes

Payment Integration: Stripe, Stripe Webhooks

Tools: Git, GitHub, VS Code

APIs & Services: Google Gemini API, Socket.io, OpenStreetMap, OSRM

Areas of Interest: Full Stack Web Development, Backend Development, AI Applications
